

CONTINUED INTERNATIONAL TRAFFICKING OF FEDERAL GOVERNMENT PROPERTY

December 15, 2025

You will have to answer to Newsom—and some of that property also had DeSantis' name on it:¹

This attempt by this faction of January sixth Donald radicals is the only reason—reluctantly—that I support Governor Gavin Newsom for the upcoming presidential election, where whoever is Vice President, will have to be approved by Mamdani—there is no other option, considering that Trump and Noem are granting immunity now for armed civilians trafficking Newsom's jurisdiction's federally funded property to Jamaica—with naked Dallas, Texas pastors' wives as a [token of Jamaican friendship].

No legal approval was made for Andrew Michael to give that particular data to that particular Andrew Michael. You *can either cease* your operations involving now the eighth or ninth year with this group, or you *can face the consequences*² of your network's now six month international breach, all of which includes hostiles outside of California, all the targets of which are federally funded operations from within California.

—AMB

Previous events:

- 2018: Refusal to vacate property (ongoing) when they were not paying rent [and demands for access to federally funded property without legal rights or permissions]
- 2019: Same; demands for federal government funded property (Texas, California, Massachusetts)
- 2020: Demands for federal government funded property or stock favors or other material information
- 2021: Demands for federal government funded property or stock favors or other material information
- 2022: Offer of housing in exchange for federal property; home break in
- 2023: Concealing opioid stockpiles
- 2024: Home break ins; knife attacks; gun attacks (this is why they are trying to put out some new revelation, which is false); demands to give up all information from California contracts
- 2025: Attempts with Gossett, Sutherland, and Austin

So now, as usual, when they are getting caught, they are releasing a barrage of lies, and considering that it is threefold (1) to conceal their crimes, which now involves international trafficking of federal government funded property and federal bribery involving federal funding (2) they illegally accessed medical data (3) they falsified medical data, they have demonstrated that there is no crime that they are not willing to commit—these are Gossett's new network, and we see what they have done since September, when Gossett tried to make his move.

¹That Defense Advanced Research Project Agency (DARPA) and National Institutes of Health (NIH) information—although public, since it was trafficked through wiretapping, is the subject or object of now interstate federal (not state, federal) felonies. And you contact people down the street from Hughes Research Laboratories?

²DARPA and NIH will coordinate with the appropriate agencies to determine this, obviously, outside of any personal preference.
